

Mercedes-Benz

### Problem statement:

Customer (Mercedes Benz) lacking resources to deliver planned internal software applications

### Technologies:

- JEE, Quarkus, Spring
- Apache Kafka
- React, JSF
- PostgreSQL
- ELK Stack - ElasticSearch, Logstash, Kibana
- Dockers
- Git

### Response:

- Provided several profiles, from junior to senior level, from req. engineer, over developers to devOps engineers
- Assigned several engineers to the already existing teams
- Provided on-job training for several juniors (coming out of our internal academy). They became operative in a very short period of time.

### Team Profiles:

- Senior PM
- Req. engineer
- Senior architects
- Junior-Senior developers
- DevOps engineers

### Result:

- Resource gaps mostly closed
- Projects are being delivered on time.
